S.M. Hazrat Ali

Frontend Engineer

hazrat17016@gmail.com | (+880) 1521334914 | Gazipur, Bangladesh | linkedin.com/in/smhazratali | github.com/Hazrat16

SUMMARY

Frontend engineer with 3+ years building production React/TypeScript applications, from component architecture to performance work that cut load times by 30–45%. Comfortable across the stack when a feature needs API support. Currently on a contract, so available to join immediately.

WORK EXPERIENCE

Firmwide — PriceEstimator.ai

Full-Stack Engineer, May 2026 – Present, Remote

- Own frontend development of a project-fee estimation and billing platform built with React 19, TypeScript, Vite, TanStack Query, Tailwind CSS and Radix UI.
- Built the proposal-to-invoice UI: enquiry intake, project scoping, proposal generation, and milestone-based, multi-currency invoicing with client-side PDF export (jsPDF, html2canvas).
- Architected a domain-driven frontend (~450 TypeScript/React files) with vertical-slice modules and enforced import boundaries.
- Added role-based UI, Microsoft Graph data in the enquiry organizer and real-time Socket.IO notifications; built supporting Node.js/Express endpoints when needed.
- Set up GitHub Actions lint, type-check and build gates and Docker builds for staging and production.

SmartCrowd

Dubai, UAE (Remote), Dec 2022 – Apr 2026

Software Engineer, Mar 2025 – Apr 2026 | Junior Software Engineer, Dec 2022 – Feb 2025

- Cut initial load time by 30–45% with code splitting, lazy loading and legacy component rework.
- Developed and scaled the React/Redux platform, integrating 5+ financial APIs across investment, portfolio and transaction workflows.
- Led delivery of the Share Transfer Facility with backend and design teams, and built 20+ reusable components that cut duplicated UI code by about 35%.
- Promoted within just over two years for frontend improvements and fintech features used by 10K+ active users.

TECHNICAL SKILLS

- Languages: TypeScript, JavaScript, HTML, CSS
- Frontend: React, Next.js, Vite, Redux Toolkit, TanStack Query, React Router, React Hook Form, Socket.IO client
- UI and styling: Tailwind CSS, Radix UI, Material UI, Chakra UI, Styled-Components, Chart.js, responsive design, accessibility (ARIA)
- Testing and quality: Playwright, ESLint, TypeScript strict checks, Sentry, LogRocket
- Backend (working knowledge): Node.js, Express, REST APIs, MongoDB, PostgreSQL, Redis
- Tools: Git, GitHub Actions, Docker, Nginx, Chrome DevTools, Postman

NOTABLE PROJECTS

- **SmartJobHub: CI/CD and AWS platform for a job portal** · Github↗: Built a 29-page app for jobseekers, employers and admins: job search and filters, applications, saved jobs, company profiles, payments, an analytics dashboard and a resume-fit tool that suggests resume bullets. Added real-time chat and notifications with the Socket.IO client, forms with React Hook Form, dark mode and ARIA labelling. Wrote Playwright tests for sign-up, sign-in and key pages that run in CI; deployed on AWS with Docker and GitHub Actions.
- **Doctor Appointment Platform (CI/CD, IaC, and Configuration Management)** · Github↗: Built a booking app with separate patient, doctor and admin dashboards behind role-based route guards. Patients search doctors and book slots, doctors manage availability and visits, and admins verify doctors and manage users. Built a reusable UI kit (buttons, inputs, selects, cards, confirm dialogs) and validated forms with Zod.
- **A Real-time Sneaker Drop Inventory** · Github↗ ·Built the storefront for a limited-stock product drop where many shoppers reserve at once. Stock updates live over Socket.IO, a live countdown shows each 60-second hold before checkout, and skeleton loaders and toasts keep the UI responsive under load. Shared TypeScript types between the React app and the Express/Prisma API in a pnpm monorepo.
- **Open source:** published two React hooks on npm, block-browser-back and checkout-risk-sdk (Checkout.com fraud-detection integration), with about 400 downloads in the past year.

EDUCATION

Mawlana Bhashani Science and Technology University

- *B.Sc. in Information and Communication Technology, CGPA 3.53/4.00 | Feb 2017 – Dec 2022*
