S.M. Hazrat Ali

Full-Stack Engineer

hazrat17016@gmail.com | (+880) 1521334914 | Gazipur, Bangladesh | linkedin.com/in/smhazratali | github.com/Hazrat16

SUMMARY

Full-stack engineer with 3+ years of production experience in React, TypeScript, Node.js/Express, MongoDB, and Redis. Builds REST and real-time APIs, fintech and billing workflows, and fast React frontends (30–45% faster load times at SmartCrowd), and ships them with Docker, CI/CD, and AWS. Currently on a contract, so available to join immediately.

WORK EXPERIENCE

Firmwide — PriceEstimator.ai

Full-Stack Engineer, May 2026 – Present, Remote

- Primary engineer for a project-fee estimation and billing platform (React, TypeScript, Node.js/Express 5, MongoDB, Redis).
- Built REST APIs with Mongoose, JWT, and Zod for enquiries, proposals, invoicing, authentication, and user management.
- Built the proposal-to-invoice workflow: enquiry intake, scoping, proposal generation, multi-currency invoicing and PDF export.
- Added Microsoft Graph/MSAL single sign-on, role-based access, OTP invitations and Socket.IO notifications.
- Set up GitHub Actions CI/CD with multi-stage Docker builds and Nginx deployments.

SmartCrowd

Dubai, UAE (Remote), Dec 2022 – Apr 2026

Software Engineer, Mar 2025 – Apr 2026 | Junior Software Engineer, Dec 2022 – Feb 2025

- Promoted within just over two years while delivering fintech features used by 10K+ active users.
- Built Node.js/Express authentication and transaction APIs; optimized MongoDB queries and caching, improving API response times by 25–35%.
- Developed React/Redux features integrating 5+ financial APIs across investment, portfolio, and transaction workflows.
- Reduced initial frontend load time by 30–45% through code splitting, lazy loading, and legacy component optimization.
- Led delivery of the Share Transfer Facility and built 20+ reusable components, reducing duplicated UI implementation by approximately 35%.

TECHNICAL SKILLS

- Languages: TypeScript, JavaScript
- Frontend: React, Next.js, Redux Toolkit, TanStack Query, React Hook Form, Tailwind CSS, Vite
- Backend: Node.js, Express, REST API design, Socket.IO, BullMQ, JWT, Zod, Mongoose
- Databases: MongoDB, PostgreSQL, Redis
- Testing: Playwright, Supertest, Node.js test runner
- DevOps: Docker, GitHub Actions, Nginx, AWS (ECS, EC2, ECR, Lambda, CloudWatch), Terraform
- Integrations and monitoring: Microsoft Graph/MSAL, OAuth, payment gateways, Sentry, LogRocket

NOTABLE PROJECTS

- **SmartJobHub: CI/CD and AWS platform for a job portal** · Github↗**:** Built a job portal for jobseekers, employers, and admins, with job posting and search, applications with status history, saved jobs, company profiles, notifications, and role-based access. Added real-time chat with Socket.IO and a Redis adapter so messages and online status work across several servers, with a test that runs two servers on one Redis. Integrated SSLCommerz payments, Cloudinary uploads, PDF resume parsing, and a BullMQ email queue, and exposed Prometheus metrics from the API. Covered the API with 15 test suites (Node test runner, Supertest) and the web app with a Playwright smoke test; deployed on AWS ECS Fargate with Terraform and GitHub Actions.
- **Doctor Appointment Platform** · Github↗**:** Built and managed CI/CD and AWS infrastructure for a full-stack booking platform (Next.js, Express, MongoDB). Automated TypeScript builds, CodeQL security scanning, and Docker image publishing to GitHub Container Registry (GHCR) using GitHub Actions. Provisioned AWS infrastructure (VPC, security groups, EC2) with Terraform and configured Linux hosts with Ansible, including Docker, MongoDB backups, Nginx, TLS, rolling deployments, and application health checks.
- **AI SQL Assistant** · Github↗: Built a full-stack PostgreSQL tool that converts plain-English questions into validated, read-only SQL with explanations. Developed the Fastify backend with schema introspection, OpenAI/Ollama, offline fallback, and AST-based safety checks, plus a Next.js frontend with results, schema browser, and connection management. Deployed locally with Docker, migrations, and seeded datasets.
- AWS and DevOps Projects: **EKS/Kubernetes** · **Terraform AWS Infrastructure** · **Serverless AWS** · **Jenkins CI/CD**

EDUCATION

Mawlana Bhashani Science and Technology University

B.Sc. in Information and Communication Technology, CGPA 3.53 out of 4.00
