Work Experience

SmartCrowd

Dec 2022 - Present

Software Engineer

Dubai, UAE (Remote)

Junior Software Engineer

Mar 2025 – Present

Dec 2022 – Feb 2025

- Promoted from Junior Software Engineer to Software Engineer within 2 years for leading frontend architecture improvements and delivering high-impact fintech product features used by **10K+ active users**.
- Developed and scaled React/Redux-based SmartCrowd platform, integrating **5+ third-party financial APIs** to support investment, portfolio, and transaction workflows.
- Improved frontend performance by **30–45% reduction in initial load time** through code-splitting, lazy loading, and optimization of legacy components.
- Built and standardized **20+ reusable UI components**, improving development efficiency by **35%** and reducing duplicated UI implementation across teams.
- Led end-to-end delivery of Share Transfer Facility (STF), coordinating cross-functional teams and ensuring **zero major post-release production issues** in a high-volume transaction system.
- Implemented backend APIs using Node.js/Express with authentication and transaction modules, and optimized MongoDB queries and caching strategies, reducing API response time by **25–35%** while integrating observability tools (LogRocket, Sentry) for faster incident resolution.

Technical Skills

Languages	JavaScript, TypeScript, C, C++
Frontend Frameworks & Library	React.js, Next.js, Redux, Redux Toolkit, Styled-Components, Tailwind CSS, Chakra UI, Material UI
Backend	Node.js, Express.js
DevOps and CI/CD	GitHub Actions, CI/CD Pipelines
Backend Frameworks	Express.js
Databases	MongoDB, PostgreSQL
Developers Tool	Git, GitHub, VS Code, Cursor, Postman, Chrome DevTools
Monitoring & Observability	LogRocket, Sentry

Notable Projects

SmartJob Hub  : Developed a full-stack platform for job seekers and employers with features including advanced job search, detailed job listings, profile management, application tracking, and saved jobs. For employers, implemented job posting, candidate management, company profiles, and analytics to monitor engagement and performance.

AI SQL Assistant  : Developed AI SQL Assistant, a full-stack PostgreSQL tool where users ask questions in plain English and receive validated, read-only SQL with explanations. Backend: Fastify, schema introspection, OpenAI/Ollama integration, offline fallback, AST-based safety checks, and secure execution against default or external databases. Frontend: Next.js chat workspace with results table, compile panel, schema browser, and connection management. Deployed locally via Docker (Postgres, Ollama) with migrations and seeded analytics-style datasets..

MediSchedule  : Full-stack booking system (Next.js, Express, MongoDB) with JWT auth and patient, doctor, and admin roles for scheduling, availability management, and admin oversight; includes Docker, CI, and cloud deployment.

Urban Eats  : Built a full-stack restaurant platform with automated CI/CD pipelines using GitHub Actions, reducing deployment time by 60. Implemented continuous integration for automated testing and continuous deployment for seamless updates to frontend and backend services. Designed a scalable Dockerized deployment workflow, improving system reliability and reducing manual errors.

TalkSphere  : Developed a full-stack real-time chat system for SmartJob Hub, enabling seamless communication between users. Server is built with Express and TypeScript, handling new client connections, assigning random usernames, broadcasting chat messages with timestamps, managing user join/leave notifications, enabling CORS for frontend communication, and providing a health check endpoint. Client is developed using Next.js 13+ with App Router, TypeScript, and Tailwind CSS, integrating Socket.IO to deliver a responsive real-time chat interface for instant messaging.

Education

Mawlana Bhashani Science and Technology University

Feb 2017 - Dec 2022

B.Sc. in Information and Communication Technology, CGPA 3.53 out of 4.00
