Work Experience

SmartCrowd **Dec 2022 - Present**

Junior Software Engineer *Dubai, UAE (Remote)*
December 2022 – February 2025

- Developed the SmartCrowd frontend using React, Redux, and Styled-components, integrating 3rd-party APIs for core FinTech functionality.
- Modernized legacy codebase and built new features to improve overall web app performance and usability.
- Collaborated with product and UI/UX teams to align features with user needs and visual design standards.
- Led responsive design efforts to ensure seamless user experience across desktop, tablet, and mobile devices.
- Directed development of the Share Transfer Facility (STF) by coordinating cross-functional teams and delivering critical features.
- Enabled multilingual support with RTL layout for Arabic, enhancing accessibility for a broader user base.
- Independently owned frontend development, driving feature delivery and ensuring on-time completion of milestones.

Software Engineer *Dubai, UAE (Remote)*
March 2025 – Present

- Promoted to Software Engineer for driving frontend architecture improvements and leading cross-functional feature delivery.
- Spearheaded performance-critical feature development, improving app load speed and reducing bundle size.
- Implemented component-level code-splitting and lazy loading for enhanced performance and maintainability.
- Standardized UI development by introducing reusable components and enforcing design system consistency.
- Integrated observability tools (LogRocket) to proactively identify UI/UX issues and track frontend performance metrics.
- Mentored junior developers and led code reviews to uphold best practices in code quality and documentation.

Technical Skills

Languages	JavaScript, TypeScript ,C,C++, Java
Frontend Frameworks & Library	React, Next.js, Styled-component, Tailwind CSS, ChakraUI, Material UI, Ant design, Bootstrap
State management library	Redux, Redux Toolkit
DevOps and CI/CD	GitHub Actions, CI/CD Pipelines
Backend Frameworks	Node.js, Spring-boot, Express.js
Databases	MySQL, Mongodb
Developers Tool	Git, GitHub, VS Code, Intelij, pgAdmin4

Notable Projects

SmartCrowd : As a Junior Software Engineer at SmartCrowd Ltd in Dubai, UAE, I specialize in frontend development for FinTech products like SmartCrowd. With expertise in React, Redux, and Styled-components, I collaborate closely with cross-functional teams to create responsive, multilingual web platforms. My proactive approach to managing frontend and backend tasks independently ensures efficient project delivery.

Urban Eats : Built a full-stack restaurant platform with automated CI/CD pipelines using GitHub Actions, reducing deployment time by 60Implemented continuous integration for automated testing and continuous deployment for seamless updates to frontend and backend services. Designed a scalable Dockerized deployment workflow, improving system reliability and reducing manual errors.

MBSTU Medical Center : Collaborated in the development of a comprehensive website for MBSTU Medical Center to manage doctor appointments, dispensary, and other medical services.Took charge of the frontend development, focusing on user interface design and interactivity.

My Contacts(backend) : My-Contact is a user-friendly application that allows users to create accounts and efficiently manage their contacts. Users can securely add, edit, and delete contact information. The application also features JWT verification to ensure secure and authenticated access for each user.

Education

Mawlana Bhashani Science and Technology University **Feb 2017 - Dec 2022**

B.Sc. in Information and Communication Technology, CGPA 3.53 out of 4.00
